The publication of NUTRITION REVIEWS has been undertaken to enable professionally trained people to keep abreast of current progress, and to have available an unbiased, authoritative review of the current research literature in the science of nutrition.

The Editorial Staff has been carefully selected so that the publication will merit, in reasonable degree, the confidence of the medical profession and others who work directly with the public in the field of nutrition. The service provided by the publication is distinct from that of an abstract journal, a review for laymen, or an extensive scientific review. Since the reviews as originally prepared by a member of the Editorial Staff are frequently modified by special referees and may be further modified by the Editorial Office in preparing final copy for the press, the Editorial Committee feels that it is preferable not to affix the names of Editorial Staff members to individual reviews. There is thus a high degree of group responsibility on the part of the Editor and Associate Editors.

Signed articles do not necessarily represent the opinion of the Editorial Staff.

THE NUTRITION FOUNDATION

The Nutrition Foundation was organized by food and related manufacturers in December, 1941, as a sincere expression of their interest in scientific progress and human health. The basic purposes of the Foundation are: (1) the development of a comprehensive program of fundamental research, providing basic information in the science of nutrition; and (2) the support of educational measures that will assist in making the science of nutrition effective in the lives of present and future generations.

The Foundation functions chiefly through grants-in-aid in support of research in university medical centers where there are facilities for research in the basic sciences and public health.

The entire program is one of public service. The funds of the Foundation are obtained through voluntary contributions from founder and sustaining members and donors. All member contributions are made on a five-year basis so that the Foundation can be assured of support for at least five years in planning its program. Grants are normally made twice each year, to become available on January 1st or July 1st.

Officers of The Nutrition Foundation

JAMES R. KILLIAN, JR., Chairman of the Board of Trustees

H. J. HEINZ, II, President

CHARLES G. MORTIMER, Vice President

CHARLES GLEN KING, Executive Director

HORACE L. SIPPLE, Executive Secretary and Treasurer

The Board of Trustees, the governing body of the Foundation, consists of representatives of contributing members and representatives of the general public.
